I came in to the Executive MBA Poznań-Atlanta program after more than ten years of professional experience including leadership roles in North America (US based), Europe, Middle East and Africa. Working in very different geography many different challenges, with diverse group of people. I want to continue my development towards general management and master business turnarounds expertise.

As I went through the Program, I realized fast it's is not only about working on knowledge, intellectual skill but about personality development as well.

On the top of that a unique opportunity to meet incredible and diverse group of people, build lifetime relations with classmates from various sectors, international and domestic lecturers, executives from worldwide-known companies and venture capitals. Two years full of group sessions, cases and workshops, international travels and number of fun evenings. All to support executive mindset development – strategic management including crisis management, public speaking followed by finance, economics, law, marketing, operations and aspects of people in organization.

Personally, holding business responsibilities, the MBA program helped me become more successful. Only in the first two years after graduation by leveraging my experience and what I've learned, skills I've developed I was able to support my organization in significant profitability increase.

Actually, the Executive MBA Poznan-Atlanta program is really meaningful experience helping me become more well-rounded business person.
